DETAILED ACTION

Election/Restrictions

1. Claims 1,3-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4; Claims 13 and 14 recite a first solder film on the base and a metal film on the base. The chosen species does not have a solder layer, Species 9, includes an insulating film on the base layer. Species 21 includes a solder film on the base. Claims 1,3-14 are withdrawn from consideration without traverse
2. Applicant's election without traverse of Group II in Paper No. 4 is acknowledged.

Specification

3. The abstract of the disclosure is objected to because The abstract is not drawn to a method of making of manufacturing a wiring substrate. Correction is required. See MPEP § 608.01(b).
4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Application/Control Number: 09/466,895
Art Unit: 3729

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Ohsawa et al (6020626).

Regarding claim 2, Ohsawa discloses a wiring pattern (66) on a base metal (72) through an insulating film (67), the layer of wiring is formed by electroplating (column 2 ln. 21-22); selectively etching the base (column 2 ln. 39-41).
